HOSPITAL MANAGEMENT SYSTEM Software Requirement Specification
A software requirements specification (SRS) is a document that describes what the software will do and how it will be expected to perform. An SRS describes the functionality the product needs to fulfill all stakeholders (business, users) needs. A typical SRS includes: An overall description. Specific requirements.

Software Requirements Specification (SRS Document) | Perforce

A software requirements specification (SRS) is a description of a software system to be developed. It is modeled after business requirements specification (CONOPS), also known as a stakeholder requirements specification (StRS). The software requirements specification lays out functional and non-functional requirements, and it may include a set of use cases that describe user interactions that the software must provide to the user for perfect interaction.

Software requirements specification - Wikipedia

A software requirements specification (SRS) is a document that captures complete description about how the system is expected to perform. It is usually signed off at the end of requirements engineering phase.

Software Requirement Specification - Tutorialspoint
